Advancing Nephrology Around the World

ISN PROGRAMS

Apply now to our nephrology education and training programs

Dear Colleague,

The ISN has decided to combine all Program application deadlines in 2015. This will help align our various ISN Programs, and will simplify the application process.

Please spread the word to everyone you know who is planning to apply for an ISN Program. Together, we will be able to further build and develop nephrology around the world in 2015!

With best regards,

John Feehally, ISN Programs Chair
Fredric Finkelstein, CME Program Chair
Paul Harden, Sister Renal Centre program Chair
David Harris, Fellowship Program Chair
Sarala Naicker, Educational Ambassador Program Chair
Marcello Tonelli, Clinical Research Program Chair
Contact us : isnprograms@theisn.org

DEADLINES OF APPLICATION HAVE CHANGED

There will be now two unique deadlines to send in your applications to our various Programs:
1 May and 1 October each year.

Don't miss the next round of applications on **1 May 2015**.

About ISN Programs

ISN Programs offer a broad range of educational and training activities to the developing nephrology community. Find out which program would suit your needs and what you need to do to apply....

The Fellowship Program gives physicians from emerging countries hands-on training in a developed renal center. Returning home, they share what they have learned, improve local care and start more ISN Programs.

[Tell Me More](#)

The Sister Renal Centers Program links renal centers in emerging countries with centers of excellence in the developing world. With educational support and guidance, the emerging centers become self-sufficient offering better care for patients. The ISN together with The Transplantation Society has also developed a specific program to link transplantation centers: the Sister Transplant center Program.

[Tell Me More](#)

The Continuing Medical Education Program offers essential teaching and training to developing medical communities. Expert speakers from both sides of the world share their knowledge and experience in clinical care and research.

[Tell Me More](#)

The Educational Ambassadors Program sends experts to developing renal centers for one to four weeks to provide specific hands-on training or help develop new services, community-based research or screening programs.

[Tell Me More](#)

The **Clinical Research Program** funds clinical research projects addressing local needs about acute and chronic kidney disease in emerging countries.
